

The journey to diagnosis and treatment among people with bronchiectasis

This survey is intended for people with bronchiectasis and their relatives

<https://www.surveymonkey.co.uk/r/Airwaysclearance>

- First, we want to learn about the difficulties people may have had until they received a diagnosis and appropriate treatments for bronchiectasis, and whether this affects how severe the illness is.
- Second, we want to learn about successes and challenges that people with bronchiectasis may experience in performing regular chest clearance.
- Lastly, there are some additional questions on choice and use of devices for inhalation of prescribed drugs.

This survey will take up to 30 minutes to complete and is anonymous. You may ask other people – your relatives, nurse, physiotherapist, or doctor – to help you with answers you are not sure of but we want to hear about your experiences.

Thank you for your help with this survey.
